

**IN THE ABSTRACT OF THE DISCLOSURE**

Replace the Abstract of the Disclosure currently of record with the attached new Abstract of the Disclosure.

A display apparatus allowing observation of the abnormal state of control target equipment is provided. A process performed by a control unit of the display apparatus capable of reproducing a moving image includes the steps of: receiving an input of an analog video signal; converting the video signal to a digital signal; reading time data; generating video data including the time data and the digital signal in relation with each other; and storing the video data in a video data storing unit.
